SAVE THESE INSTRUCTIONS

NOTE: Check Carriers for shipping damage. If shipping damage is noted, DO NOT use. Contact carrier/dealer for further instructions.

SAFETY SUMMARY

To ensure the safe installation of the Oxygen Cylinder Carriers, these instructions MUST be followed:

GENERAL WARNINGS

DO NOT install or use this equipment without first reading and understanding these instructions. If you are unable to understand the Warnings, Cautions or Instructions, contact a healthcare professional, dealer or technical personnel before attempting to install this equipment - otherwise, injury or damage may occur.

INSTALLATION WARNINGS

Velcro hook pieces found on the bottom of the carrier MUST be in contact with floor surface at all times during travel.

Carrier is not recommended for use in the passenger compartment of the vehicle.

When transporting cylinders into the Carrier, ensure velcro straps are fastened.

Plastic spacer should be used to take up extra space when transporting D-sized cylinders.

Ensure all straps are firmly in attached in place.

Do not use if velcro hooks found on the bottom of the unit become unattached.
DESCRIPTION

Using molded plastic technology, the Oxygen Cylinder Carrier is specifically designed to transport post-valve, C, D and E-sized oxygen cylinders in the trunk of your car. Fastened by velcro strips to the trunk floor, the Carrier cradles the cylinders and prevents them from rolling during travel.

To use the Cylinder carrier, strap in the cylinders into place, and attach the entire unit to the trunk floor with the velcro pieces supplied.

INSTALLING THE OXYGEN CYLINDER CARRIER
MODEL NO. OCC100

NOTE: Refer to the INSTALLATION WARNINGS in the SAFETY SUMMARY of this instruction sheet.

1. Ensure all obstacles which may inhibit the Carrier from sitting flat on the trunk floor are removed.
2. Place empty Carrier on carpeted flooring of the trunk with the velcro pieces found on the bottom of the unit firmly attached to the carpet.
3. Place cylinder(s) into the carrier, using the spacer provided when transporting C-Tanks.
4. Attach two (2) cylinder straps, found on the side of the Carrier device, over the tank(s) and affix to the other side for a secure fit.

CARING FOR YOUR OXYGEN CYLINDER CARRIER

1. The Oxygen Cylinder Carrier can be cleaned using soap and water.
